CAREER BACKGROUND

Aspiring software developer with a strong interest in game development and software engineering. Passionate about solving real-world problems through technology. Continuously expanding skills in programming and game development.

EDUCATIONAL BACKGROUND

BSc (Hons) Computing

Islington College, London Metropolitan University · Kamal Marg, Kamalpokhari, Kathmandu
2024 – Present

SLC

Little Angels' Secondary School, NEB · Hattiban, Lalitpur
2022 – 2024

SEE

Little Angels' School, NEB · Hattiban, Lalitpur
2022

SKILLS

Technical Skills Game Development · UI/UX · VCS with Git · Web Development · Software Engineering · UNIX-based Operations · Docker Basics

Programming Languages Python · Java · JavaScript · GML · GDScript

Operating Systems macOS · Windows · Linux (NixOS, Ubuntu)

Tools & Software Git & GitHub · Godot · GameMaker · IDLE (Python) · IntelliJ · Eclipse · Trello

Soft Skills Communication · Time Management · Task Management · Creative & Visual Thinking · Adaptability · Logic & Problem Solving

PROJECTS

Academic

GameVault [Web App · Java]

- Developed a game marketplace web application with role-based access.
- Implemented user authentication, game purchasing, backend validation, and database integration.
- Applied the MVC architecture using Java Servlets, JSP, and MySQL.

Personal

Tiny Town [GameMaker · GML]

- Developed a 2D resource management game in two weeks for a game jam.
- Implemented NPC interaction and resource production system.

Capture the World [GameMaker · GML]

- Developed a territory-capturing game featuring a grid-based map.
- Implemented trail formation, area capture, and player movement systems.

Dodge the Creep [Godot · GDScript]

- Built a 2D survival game using official Godot documentation.
- Implemented enemy spawning and collision detection system.
- Gained experience with Godot's node system, signals, and GDScript.
